

# A Higher Standard of Quality

## It's no accident that each and every Cleaver-Brooks gasket fits.

At Cleaver-Brooks, we are dedicated to a higher standard of quality. We make sure that every one of our gaskets stands up to its original design by examining and refining each size, shape, and thickness until it meets our exacting requirements.

## But there's more...

For starters, we use the finest compounds available. Each gasket is sufficiently resilient to give you an immediately perfect seal.

And, since each application is different, we offer more than 100 selections from which to choose. From large to small, we've got a gasket to fit your need.

In addition, Cleaver-Brooks gaskets are boiler tested under extreme pressure and temperature. That's how we can be sure that every gasket you buy will be safe and durable.

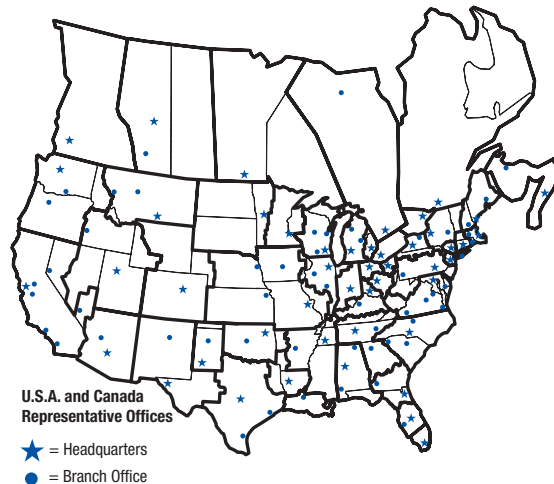

## Quality. Composition. Variety.

**Reliability.** When it comes to supplying your sealing needs, nobody does it better than Cleaver-Brooks.

## Waterside Gaskets

### Molded Rubber Gaskets

- Designed for pressure up to 150 psig.
- Special rubber construction for an immediately perfect seal.
- Consistent sizing for an immediate fit.
- Over 100 sizes available to fit various applications and boiler makes.
- Various shapes to choose from:

### Spiral Wound Gaskets

- Asbestos-free materials.
- Designed for pressure up to 999 psig.
- 304 Stainless Steel construction for extended life under high pressure and high temperature conditions.
- Specially manufactured to maintain a uniform, tight seal.

## Fireside Gaskets

### Segmented Gaskets

- Asbestos-free materials.
- Consistent hole spacing for an immediate fit.
- Interlocking tabs for fast, easy installation.

### Tadpole Gaskets

- Asbestos-free materials.
- Specially manufactured to lay flat for fast, easy installation.
- Thicker, heavier weave for a better seal.
- Consistent hole spacing for an immediate fit.

### Rope Gaskets

- Asbestos-free materials.
- High density fiber glass construction for a better seal.
- Accurate sizing for an immediate fit.

## Gasket Kits

### Fireside and Waterside Kits

- Designed for sealing boiler after inspection.
- Kits to fit all Cleaver-Brooks boilers.
- All necessary gaskets and fasteners included for convenience.
- Includes only genuine Cleaver-Brooks gaskets to maintain highest factory standards.
